

# 401 Vale View GALAXY 2 (PS)

A well balanced young bull with plenty of meat & leg under him, easy doing type, wide from above & thick from behind.

Dam produced 3 calves to date ; a heifer sold privately to CV Droughtmasters, a steer & Galaxy. A lovely framed cow by the ever consistent Durack Quartpot. We love the Quartpot females we have in our herd, real wedge shaped fertile cows.

Sire has many good qualities, but mostly was retained due to his breeding; his dam VV Kandy was that good we collected tissue sample for her to be cloned down the track. Rondel Korageous/VV Patty (she's the sire of VV Zed) on the sire side. He has sold 4 sons to avg \$11,250, his daughters are doing a great job in our herd.

Sire: Vale View Yes Man

A son of Vale View Yes Man that we have retained this year to keep the line going
